TikitLink

Designed to integrate with iManage WorkSite document management system, TikitLink provides a range of features that enable law firms to realise the full potential of their document management system.

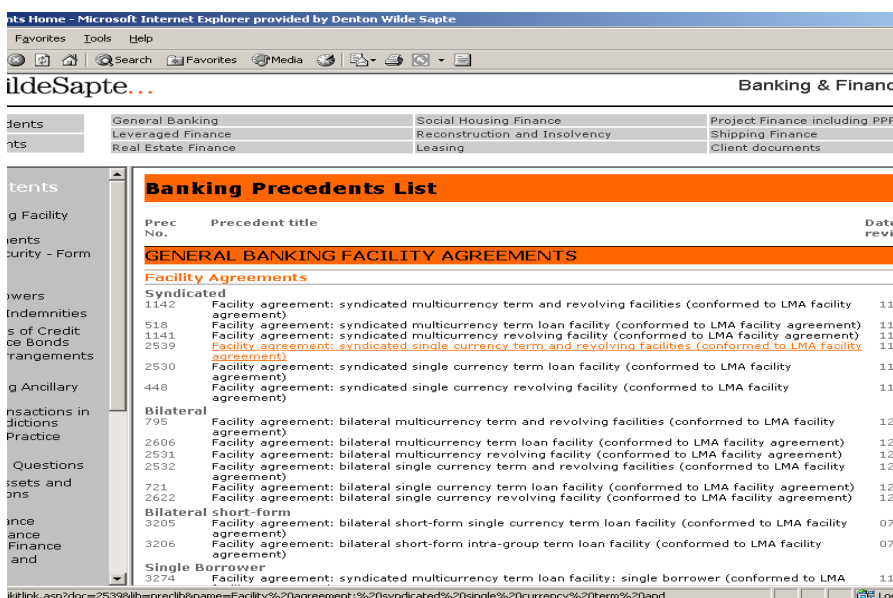

Product Description

TikitLink allows documents within the WorkSite electronic filing system to be linked and accessed via hypertext links - either from within other documents or from intranet sites.

Key features & benefits:

- Allows users to navigate between associated precedent documents and guidance notes with ease, maximising the value of precedents and minimising the time spent searching for key documents
- A link to a single document is not always helpful. TikitLink allows users to insert a link to a selection of associated documents that have been grouped by a specific search or project
- The hypertext links inserted by TikitLink are dynamic and therefore facilitate the creation of live links between related know-how documents. This helps to ensure that fee-earners are guided to all relevant know-how that may be of assistance to them with minimum effort and intervention
- TikitLink can be used to create hypertext links from the firm's intranet to key documents e.g. precedent documents and HR Forms. These links, when used, open the original document within WorkSite and the user access is therefore validated by the firm's standard WorkSite security
- Users can print a source document and all linked documents with a single print command, which is useful for research and meeting preparation

TikitLink is in use at Denton Wilde Sapte as an intranet content management solution. Precedents are listed under navigable subject headings, and each precedent title links through to the live document in the DMS via TikitLink links.

Prec No.	Precedent title	Date revised
GENERAL BANKING FACILITY AGREEMENTS		
Facility Agreements		
Syndicated		
1142	Facility agreement: syndicated multicurrency term and revolving facilities (conformed to LMA facility agreement)	11

"We urgently required a system which would make us more integrated, efficient and technologically able to manage the growing amount of information we have. We chose TikitLink due to its simplicity and user-friendly structure whilst offering advanced web based functionality. Within a couple of days of TikitLink being installed, I had created the first departmental online precedents list - this was exactly what we needed at Denton Wilde Sapte."

Kim Walton,
Professional Services Development Manager
Denton Wilde Sapte LLP
