

## WorkSite Exporter

Exporting data is fast and easy, whether dictated by mobile/remote groups, mergers & acquisitions, or employee exit policies.

### WorkSite Exporter's key features:

- Exports everything in one or more WorkSpaces or folders – works in matter-centric or non-matter centric systems
- Preserves organizational structure of exported content
- Creates comprehensive log files of all content and structures exported, including all metadata, security, and history values
- Offers differential exporting capabilities for fastest possible export of large WorkSpaces, only exporting new or changed content
- Works with DocAuto's ilmport product to provide full "round-tripping" of content out of and back into WorkSite

- Allows viewing of detailed reports of all files and structures exported, with user-specified data fields
- Can record history events of export activity on individual documents if desired

### The benefits to you:

- Easily exports everything in multiple folders or WorkSpaces
- Conducts rapid and comprehensive updating exports
- Creates exhaustive reports of all structural and document metadata, security, history, and more

This powerful desktop product is an add-in to DeskSite or FileSite clients that can be distributed to selected users or system administrators. The combination of ilmport and WorkSite Exporter provides full "round-trip" capabilities for exporting and re-importing content.

DocAuto provides a comprehensive suite of software solutions for Autonomy iManage WorkSite that reduce risk, improve user experience, and optimize performance.

Trusted by hundreds of firms worldwide, DocAuto provides industry-leading software, domain expertise, and dedicated customer service.
