

Content Management

ilImport

The most powerful tool for importing content into WorkSite in either automated or on-demand jobs – whether migrating from a different content management or no system at all, or needing to process new volumes of content.

ilImport's key features:

- Imports documents from any number of sources in one job
- Permits you to read and write to any number of ODBC data sources for document or structural information, including profile data, security, and history
- Can stage up to 15 steps of workflow processing for each document, including setting security
- Operates automatically (unattended) or manually (on-demand)
- Provides full data logging of all operations

- Provides support for differential importing, with version control
- Works with DocAuto's WorkSite Exporter to provide full "round-tripping" of content out of and back into WorkSite

The benefits to you:

- Saves time and money by efficiently importing documents
- Leverages existing data to restore metadata, security, history
- Can import documents and match to existing structures or recreate matter-centric structures on-the-fly
- Provides greater flexibility and control of the importing process

With ilImport, you can even use data-driven methods to create branching workflow processes that determine where to place content, set metadata, security, and more.

DocAuto provides a comprehensive suite of software solutions for Autonomy iManage WorkSite that reduce risk, improve user experience, and optimize performance.

Trusted by hundreds of firms worldwide, DocAuto provides industry-leading software, domain expertise, and dedicated customer service.

Founded in 1997 and an iManage Developer partner since 1999, DocAuto is the leading provider of enhancements for Autonomy iManage WorkSite that make matter-centricity easy, flexible, and secure.
